EDUCATION

- **Dr.Ambedkar Institute of Technology** Bangalore, India
Bachelor of Engineering in Computer science and engineering; CGPA: (9.06/10.0) Aug 2017 – Sep 2021
- **Christ Junior PU College** Bangalore, India
Pre-University Degree;Percent:(95/100) Jun 2015 – May 2017

EXPERIENCE

- **Deloitte USI** Bangalore, India
Consultant - Full stack Developer June 2025 - Present
 - **IBOR Consultant:** Worked on the NeoXam IBOR platform, handling high-volume trade processing and reconciliation in a Java-based system; collaborated with cross-functional teams to resolve discrepancies and ensure accurate IBOR data for reporting and auditing.
 - **Java and AWS Development:** As an AWS Certified Developer, contributed to the migration of NeoXam from on-premise to AWS, leveraging S3, Lambda, Kinesis, DynamoDB, and CloudWatch for scalable data processing, monitoring, and event-driven workflows.
 - **Development:** Worked extensively on Java-based backend systems, modifying and enhancing business logic for trade processing and reconciliation; built and supported lightweight UI components using Angular to improve internal tools and data visibility.
- **NTT Data Services** Bangalore, India
Software Engineer - Full stack Developer Mar 2022 - Present
 - **Insurance website for Agents:** Engineered an insurance website for agents using Angular for the front-end, Spring Boot for the backend, and MySQL for database management. Implemented a modular architecture to streamline feature updates and improve scalability, ensuring seamless data integration across the application.
 - **Project upgrade:** Spearheaded the integration of Angular, an open-source front-end framework, with third-party libraries. Designed and implemented user-friendly features for an insurance website targeted at agents, ensuring cross-browser compatibility using HTML5, CSS3, Bootstrap, and jQuery. Successfully upgraded an Angular project from Version 7 to Version 13 and Bootstrap from Version 3 to Version 5, aligning all services and UI components with the latest standards. These upgrades resulted in a 30% improvement in web page performance and a 25% reduction in memory consumption.
 - **GTM to GA4 migration:** With over 20,000 daily agent users on the application, tracking the most frequently used features is critical. Led the migration from Google Tag Manager (GTM) to Google Analytics 4 (GA4), ensuring a seamless transition and compatibility with the updated tracking mechanisms.
 - **Backend - Spring boot:** Built robust, scalable web applications using Spring Boot, leveraging core Spring concepts like Spring Security, Spring Data JPA, Spring MVC, and AOP (Aspect-Oriented Programming), leading to a 40% reduction in response time and enhanced user experience.
 - **Project Enhancements:** Collaborated cross-functionally to build RESTful APIs, integrated SQL databases via Spring Data JPA, and ensured security using Spring Security, resulting in a 25% increase in customer satisfaction. Achieved significant code optimization by reducing complex code from 30 lines to 2 lines using Spring Boot's streamlined features, while also addressing and resolving security vulnerabilities identified by Checkmarx scans.

PROJECTS

- **Insurance Toolkit:** Designed and delivered an Insurance Toolkit, a website tailored for more than 20,000 insurance agents' use within the company's network, resulting in a 20% increase in agent productivity and a 15% decrease in processing time for insurance policies.

PROGRAMMING SKILLS

- **Languages:** TypeScript, JavaScript, Java 8, SQL, MySQL, HTML5, CSS3, Bootstrap, RDBMS, JSP
- **Frameworks and Libraries:** Angular, Spring Boot, Spring MVC, Spring Security, React, React Native
- **Technologies and Tools:** AWS Services, Docker, Jenkins, Bitbucket, CI/CD, JPA/Hibernate, Maven
- **Other skills:** Jira, Figma, Agile/Scrum, Unit Testing (JUnit, karma), Code Reviews, JWT
